Integrated Operations and supply Chain Planning_mod.14 (Industry Lab - Group 1)	03/05/18	ROCCA ROBERTO Fumagalli Luca	Supply Chain Manageme nt & Purchasing (SCPM)	4,0	4,2	4,1	3,5	1: Lab should be on the same day of the lecture; 3: I would suggest that the explanation of the machine and its operation should be done at the beginning of the lab, and after that relate the theory with what the students saw while it was working. The exercise at the end was good.; 5: This was an eye-opening and interesting experience. Being able to see a physical pilot manufacturing cell helps students visualize the teaching materials on Industrial 4.0; 8: Great to put in place what we learn and to work on such projects! Mr. Rocca was really good at explaining. I think the final hour with the presentation should be used in another way, because working in big groups on such small topics makes it hard to actually learn something! For the rest, great, I hope we will do more of these things in the future; 9: Very helpful to see the concepts seen in class in the manufacturing cell!; 12: More time should have been allotted to the practical activity; 15: The lab is too general. And no teaching material has been delivered. I think the lab should provide more clear ideas;	23
Integrated Operations and supply Chain Planning_mod.14 (Industry Lab - group 2)	10/05/18	ROCCA ROBERTO Fumagalli Luca	Supply Chain Manageme nt & Purchasing (SCPM)	4,2	4,4	4,2	3,3	1: It was good; 2: Lesson too confusing and boring. Too many contents for one lesson. The prof didn't manage it properly too.;; Was usefull to understand concepts of Ind. 4.0; 3: The powerpoint presentation used in the lab session was much better than the one used in the lecture. I think the lecture should be more like this - focusing only on a few key aspects of Industry 4.0 that would be relevant to industrial managers. It was also nice to see the lab simulation first hand.;; 4: No necessary for this lab; 5: It was an interesting topic and the professor was really knowledgeable and competent.;; 6: It is not a lab consistent enough. We are just looking, but almost not doing enough. However it is interesting to see how it works but maybe not for three hours;	21
